PROFESSIONAL SUMMARY

Software Developer (B.Tech Information Technology, 2022 -2026) focused on backend development with Python, Django, REST APIs and PostgreSQL, targeting Python Developer, Backend Developer, Full-Stack Developer and SDE-1 roles. Built and deployed four full-stack applications (2023 - 2026), including a College ERP serving 50+ students, 13 faculty and 15 courses with automated 75% attendance-shortfall alerts, a Celery-driven inventory system, and a real-time WebSocket chat application.

TECHNICAL SKILLS

Languages: Python, JavaScript
Backend: Django, Django REST Framework, Django Channels, Daphne (ASGI), REST APIs, WebSockets, Celery, Celery Beat, Stripe API
Databases and Caching: PostgreSQL, MySQL, SQLite, Redis
DevOps and Tools: Git, GitHub, Docker, Nginx, Gunicorn, WhiteNoise, Postman, Render, Cloudinary
Security: Token-Based Authentication, Role-Based Access Control (RBAC), django-allauth, Session Management
Frontend: HTML, CSS, Bootstrap
Concepts: Object-Oriented Programming, Data Structures and Algorithms, Database Design, API Integration

PROJECTS

Django Chat Application May 2026
Live: django-real-time-chat-application.onrender.com | GitHub: github.com/divyanshh22/Django-Real-Time-Chat-Application

- Built a real-time chat application with Django Channels, WebSockets and Redis, enabling instant multi-user messaging without page reloads.
- Implemented user authentication, session management, Cloudinary-based media storage and JavaScript form validation, with PostgreSQL as the primary database.
- Containerized the application using Docker and deployed it on Render with Daphne (ASGI) and PostgreSQL.

Inventory and Order Management System January 2025
Live: inventory-order-management-system-gttj.onrender.com | GitHub: github.com/divyanshh22/Inventory-Order-Management-System

- Developed a REST API backend with Django REST Framework featuring token-based authentication, role-based access control and guest read-only access.
- Automated low-stock alerts with Celery Beat and Redis, removing the need for manual stock checks.
- Designed PostgreSQL schemas with immutable stock-movement records for a reliable inventory audit trail.
- Generated PDF invoices with ReportLab and deployed the application on Render using Gunicorn and WhiteNoise.

College ERP System August 2024
Live: college-erp-system-fkr1.onrender.com | GitHub: github.com/divyanshh22/College-ERP-System

- Engineered a full-stack College ERP with Django, Django REST Framework and PostgreSQL, supporting 50+ students, 13 faculty and 15 courses through role-based dashboards for students, faculty and administrators.
- Implemented attendance tracking with automatic percentage calculation and alerts for students below 75%.
- Built modules for exam marks, weekly timetables and faculty reports, and deployed on Render with Gunicorn, WhiteNoise and automated database migrations.

Full-Stack E-Commerce Platform September 2023
Live: full-stack-e-commerce-platform-6gy3.onrender.com | GitHub: github.com/divyanshh22/Full-Stack-E-Commerce-Platform

- Built an e-commerce platform with Django and PostgreSQL covering product catalog, shopping cart, checkout, discount coupons and refund requests.
- Integrated Stripe payment gateway (test mode) and django-allauth authentication for secure checkout and accounts.
- Developed an admin dashboard to manage products, orders and coupons, and deployed on Render using Gunicorn and WhiteNoise.

EDUCATION

Bachelor of Technology in Information Technology 2022 - 2026
Oriental Institute of Science and Technology, Bhopal
Relevant Coursework: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), Database Management Systems (DBMS)

Senior Secondary (CBSE) 2019 - 2021
Delhi Public School Nagpur Road, Jabalpur

CERTIFICATIONS

AI/ML for Geodata Analysis - ISRO
Programming Fundamentals with Python - Infosys
