## PROFESSIONAL SUMMARY

Python Backend Developer (B.Tech Information Technology, 2026) specializing in Django, REST APIs, PostgreSQL and asynchronous task processing with Celery. Built and deployed four full-stack applications, including a real-time WebSocket chat app, an inventory system with Celery-scheduled low-stock alerts and a role-based College ERP. Seeking Python Developer, Backend Developer or SDE-1 roles.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, SQL
**Backend:** Django, Django REST Framework, Django Channels, Daphne (ASGI), REST APIs, WebSockets, Celery
**Databases and Caching:** PostgreSQL, MySQL, SQLite, Redis
**DevOps and Tools:** Git, GitHub, GitHub Actions (CI/CD), Docker, Nginx, Gunicorn, Postman, Render, Cloudinary
**Testing:** Pytest, Unit Testing, API Testing
**Security:** Token-Based Authentication, Role-Based Access Control (RBAC), django-allauth, Session Management
**Frontend:** HTML, CSS, Bootstrap
**Concepts:** Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), DBMS, RESTful API Design

## PROJECTS

**Real-Time Chat App** **May 2026**
Live Demo: chattingapp-r4kq.onrender.com | GitHub: github.com/divyanshh22/realtime-chat-app

- Built a real-time chat application with Django Channels, WebSockets and Redis, delivering instant multi-user messaging without page reloads, tested with 25 users.
- Implemented session-based authentication, Cloudinary media storage and JavaScript form validation on PostgreSQL.
- Containerized the application with Docker and deployed it on Render with Nginx and Daphne (ASGI).
- Developed a Pytest suite covering models, auth, WebSocket consumers and security, with a GitHub Actions CI pipeline running lint checks, tests and Docker build on every push.

**Inventory Management System** **January 2025**
Live Demo: inventory-web-urvv.onrender.com | GitHub: github.com/divyanshh22/inventory-management-sys

- Developed a REST API with Django REST Framework (15+ endpoints), enforcing token authentication and role-based access control across 4 roles (Admin, Manager, Staff, Vendor) plus read-only guest access.
- Implemented the order lifecycle (pending, processed, shipped, cancelled) with atomic stock deduction and automatic restock on cancellation, auditing every change in immutable stock-movement records.
- Built low-stock email alerts as Celery tasks scheduled with django-celery-beat, plus PDF invoice generation (ReportLab) and inventory, top-product and vendor-revenue reports; deployed on Render with Gunicorn.
- Developed a Pytest suite covering RBAC, order lifecycle, stock integrity and Celery tasks, with a GitHub Actions CI/CD pipeline running tests on PostgreSQL and Redis, and Render auto-deploying only after checks pass.

**College ERP System** **August 2024**
Live Demo: college-erp-system-fkr1.onrender.com | GitHub: github.com/divyanshh22/college-erp-sys

- Engineered a full-stack College ERP with Django, Django REST Framework and PostgreSQL, with 3 role-based dashboards (Administrator, Faculty, Student) built using HTML, CSS and JavaScript.
- Implemented per-subject attendance tracking with automatic percentage calculation against the 75% requirement, plus marks entry for internal tests, events and semester exams.
- Built a token-authenticated REST API (5 endpoints), weekly timetables with a free-teacher lookup and CIE reports; deployed on Render with Gunicorn and WhiteNoise.

**E-Commerce Platform** **September 2023**
Live Demo: full-stack-e-commerce-platform-6gy3.onrender.com | GitHub: github.com/divyanshh22/ecommerce-app

- Built an e-commerce platform with Django and PostgreSQL covering product catalog, cart, checkout, discount coupons and refund requests, with a custom UI in HTML, CSS and JavaScript.
- Integrated Stripe payments (test mode) and django-allauth authentication, enabling secure checkout and user accounts.
- Developed an admin dashboard to manage products, coupons and orders, plus a management command that seeds 30 products.
- Deployed on Render with Gunicorn, WhiteNoise and a render.yaml blueprint automating migrations and admin setup.

## EDUCATION

**Bachelor of Technology in Information Technology** **2022–2026**
Oriental Institute of Science and Technology, Bhopal | Coursework: OOP, Data Structures and Algorithms, DBMS

## CERTIFICATIONS

AI/ML for Geodata Analysis - ISRO
Programming Fundamentals with Python - Infosys
