PROFESSIONAL SUMMARY

Software Developer (B.Tech IT, Batch 2022–2026) with a focus on backend development using Python, Django, REST APIs, and PostgreSQL. Experienced in building and deploying applications, including a real-time chat app and an inventory management system. Seeking opportunities as a Software Developer, Python Developer, Backend Developer, or Full-Stack Developer.

EDUCATION

B.Tech in Information Technology *2022–2026*
Oriental Institute of Science and Technology, Bhopal
Relevant Coursework: OOP, Data Structures & Algorithms, DBMS, Artificial Intelligence

Senior Secondary School (CBSE) *2019–2021*
Delhi Public School Nagpur Road, Jabalpur

SKILLS

Programming Languages: Python, JavaScript
Backend: Django, Django REST Framework, Django Channels, Daphne, REST APIs, Celery, WebSockets
Frontend: HTML, CSS, Bootstrap
Databases & Caching: PostgreSQL, MySQL, SQLite, Redis
Tools & Platforms: Git, GitHub, Docker, Postman, Nginx, Gunicorn, Cloudinary, Render
Core Competencies: Object-Oriented Programming (OOP), Backend Development, Full-Stack Development, REST API Development, Database Design, API Integration, Authentication & Authorization
Soft Skills: Problem-Solving, Team Collaboration, Adaptability, Technical Communication

PROJECTS

Django Chat Application *May 2026*
Live Link: https://django-real-time-chat-application.onrender.com

- Developed a real-time chat application using Django Channels, WebSockets, Redis, and PostgreSQL, implementing authentication, session management, and Cloudinary-based media storage.
- Implemented JavaScript form validation and dynamic chat-page interactions to support a responsive user experience.
- Deployed the application on Render with an ASGI-based serving stack using Daphne.
- **Technologies:** Python, Django, Django Channels, NginxDaphne (ASGI), WebSockets, Redis, PostgreSQL, Pillow, Cloudinary, HTML, CSS, JavaScript, Docker, Render.

Inventory & Order Management System *January 2025*
Live Link: https://inventory-order-management-system-gttj.onrender.com

- Developed a full inventory and order management system using Django REST Framework, featuring token-based authentication, role-based access control, guest read-only access, and a custom HTML/CSS/JavaScript frontend.
- Implemented stock tracking, immutable stock-movement records, automated low-stock alerts using Celery Beat, PostgreSQL database schemas, and PDF invoice generation with ReportLab; deployed on Render using Gunicorn and WhiteNoise.
- **Technologies:** Python, Django, Django REST Framework, PostgreSQL, Redis, Celery, ReportLab, HTML, CSS, JavaScript, Gunicorn, Render.

College ERP System *August 2024*
Live Link: https://college-erp-system-fkr1.onrender.com

- Developed a full-stack College ERP using Django, Django REST Framework, and PostgreSQL, with role-based dashboards for students, faculty, and administrators, supporting 50+ students, 13 faculty, and 15 courses.
- Implemented attendance tracking with percentage calculations and 75% shortfall alerts, exam marks, weekly timetables, and faculty reports; deployed on Render with Gunicorn, automated migrations, and WhiteNoise static serving
- **Technologies:** Python, Django, Django REST Framework, PostgreSQL, HTML, CSS, Bootstrap, Gunicorn, Render.

Full-Stack E-Commerce Platform *September 2023*
Live Link: https://full-stack-e-commerce-platform-6gy3.onrender.com

- Built an e-commerce platform using Django and PostgreSQL with a product catalog, shopping cart, checkout flow, discount coupons, refund requests, and an admin dashboard for managing products, orders, and coupons.
- Integrated django-allauth authentication and Stripe (test mode); deployed on Render using Gunicorn and WhiteNoise.
- **Technologies:** Python, Django, Django REST Framework, Bootstrap, PostgreSQL Payment Gateway APIs, HTML, CSS, JavaScript.
